## 1、 Product overview

Seatory R series full-panel YMCK ribbon consist of yellow (Y), magenta (M) and cyan (C) panels for printing a full spectrum of colors by combining the colors using varying degrees of heat. The K panel is a black resin panel, typically used for printing text and barcodes

YMCK is used to print a combination of full-color images and monochrome text or barcodes. This ribbon can only be used in Seatory R series card printers. To maximize print card quality and card printer durability, please use the Seatory original ribbon.

## 2、 Main features

### ● Durability and excellent print quality

Print clear, bright images and text. In addition to the standard colors (Yellow, Magenta, Cyan and Black), the printing will be used in conjunction with the retransfer film. The film can be anti - oxidation discoloration, fading, waterproof, anti - fingerprint and other functions.

### ● Safety

Seatory R series full-panel YMCK ribbon will not be able to be color printed again after PVC card printed text, barcode and images and covering the surface retransfer film overlay. This way can prevent card information from being tampered.
